**HOLESAW15**

1.5" Bi-Metal Hole Saw
(used for RSST 215 to 315 series saddles)

**TWRENCH**

Torque Wrench 20-150 LB

SPECIFICATION

Leemco products with bolts and nuts require a specific torque setting. The Leemco torque wrench will be used and is adjustable from 20-150 LB of torque. All Leemco RSST 215- to 315-Series stainless steel saddles require a predrilled 1.5" hole into the pipe before installation. The installer will use the Leemco hole saw to achieve this. After the hole is drilled out, the installer should clean all debris from the pipe and hole so the saddle can fit properly.

LEEMCO HAS A LARGE VARIETY OF FITTING
AND VALVE ACCESSORIES.
